DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 thru 37, 40 thru 51, 53 thru 69, and 78 thru 100, drawn to semiconductor device, classified in class 257, subclass 622.
 - II. Claims 38, 39, 52, 70 thru 77, and 101 thru 105, drawn to method of making a semiconductor device, classified in class 438, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as the product made and the process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. For example, as an alternative to the methods set forth in claims 38, 39, 52, 70-77, and 101-105, instead of removing the silicon substrate to expose a backside of the transition layer, one can form a silicon substrate that already exposes the backside of the transition layer without removing any of the silicon substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2815

4. If Group I is elected, a further restriction is required.

This application contains claims directed to the following patentably distinct species of the claimed invention.

Species I.	FIG. 1
Species II.	FIG. 2
Species III.	FIG. 3
Species IV	FIG. 4
Species V.	FIG. 5
Species VI.	FIG. 6
Species VII.	FIG. 7
Species VIII.	FIG. 8
Species IX.	FIG. 9
Species X.	FIG. 10
Species XI.	FIG. 11
Species XII.	FIG. 12
Species XIII.	FIG. 13
Species XIV.	FIG. 14
Species XV.	FIG. 15
Species XVI.	FIG. 16
Species XVII.	FIG. 17
Species XVIII.	FIG. 18
Species XIX.	FIG. 19

Species XX.	FIG. 20
Species XXI.	FIG. 21
Species XXII.	FIG. 22
Species XXIII.	FIG. 23A-23K
Species XXIV.	FIG. 24
Species XXV.	FIG. 25

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
